

SARADA GUMMADI

Executive Director · Cloud, AI & Engineering Leadership

attaluri.sarada@gmail.com · +65 9035 6985 · Singapore · [linkedin.com/in/sarada-gummadi](https://www.linkedin.com/in/sarada-gummadi)

EXECUTIVE PROFILE

Senior technology executive with 20+ years of experience leading enterprise-scale cloud platforms, multi-cloud engineering, and secure AI/ML enablement in complex, regulated environments. Proven track record of building scalable platform capabilities, modernising legacy systems into resilient cloud-native architectures, and driving large-scale technology transformation with measurable impact across scalability, operational efficiency, governance, and compliance.

Led platforms supporting 1,000+ production applications and enabled 700+ AI/ML workloads across AWS and Azure, embedding security and governance controls from the outset. Experienced in establishing strategic engineering functions, leading globally distributed teams through organisational change and technology strategy pivots, and delivering critical platform capabilities under sustained ambiguity. Recognised for strong stakeholder influence, principled technical leadership, and building trusted partnerships across Engineering, Architecture, Cyber, and Risk.

AREAS OF EXPERTISE

Cloud Platform Strategy & Governance (AWS, Azure, multi-cloud)

AI/ML Platform Enablement (enterprise onboarding, controls, provisioning, GenAI adoption & innovation)

Site Reliability Engineering (SRE, observability, platform resilience)

Cloud Cost Governance (structural optimisation, lifecycle automation)

Global Engineering Leadership (hiring, mentoring, coaching managers)

DevSecOps & CI/CD Transformation (policy-as-code, shift-left governance)

Regulatory & Compliance Assurance (continuous controls, risk frameworks)

Executive Stakeholder Engagement (Cyber, Risk, Architecture, C-suite)

PROFESSIONAL EXPERIENCE

Executive Director — Cloud Platform Engineering & AI Infrastructure
JPMorgan Chase & Co., Singapore · Global Remit

Apr 2022 – Present

Led enterprise cloud platform strategy, AI/ML infrastructure enablement, and engineering governance across AWS and Azure. Directed globally distributed engineering teams through multiple organisational restructures and strategic pivots while maintaining delivery continuity and platform stability.

- **Established the firm's continuous compliance assurance capability** by embedding automated control validation and evidence generation directly into CI/CD pipelines across 500+ policies, providing Cyber and Risk leadership ongoing, auditable assurance without manual intervention.
- **Drove firm-wide cloud cost optimization** through landing zone re-architecture and automation initiatives, including lifecycle management capabilities for compute scheduling and orphaned resource cleanup — contributing to an estimated 20% reduction in cloud spend.
- **Enabled enterprise AI/ML platform infrastructure at scale.** Designed and delivered the platform foundation enabling 700+ AI/ML workloads across Azure OpenAI and AWS Bedrock — including governance controls, provisioning models, and onboarding workflows that accelerated secure GenAI adoption.
- **Led Azure platform engineering from inception to General Availability**, navigating multiple strategy shifts and aligning Architecture, Cyber, Risk, and Engineering stakeholders to achieve Permit-to-Operate standards. Maintained team motivation and delivery momentum through repeated uncertainty.
- **Redirected a high-risk vendor-led testing approach** by challenging the use of unsupported Microsoft APIs and securing alignment on a more sustainable strategic alternative without impacting delivery timelines.

- **Transformed engineering productivity through AI-assisted development practices**, introducing GitHub Copilot-driven test generation that reduced per-service test authoring effort from approximately one day to under five minutes
- **Established a centralised cloud asset governance** across AWS and Azure, enabling identification and remediation of 100K+ non-compliant resources, materially reducing operational and regulatory risk exposure.

Vice President — Head of APAC Cloud SRE, Amazon Web Services

Nov 2019 – Dec 2021

JPMorgan Chase & Co., Singapore · Global Remit

Appointed to establish the APAC Cloud SRE function from inception following AWS platform General Availability. Built and led a globally distributed team supporting 1,000+ production applications, 24/7 operations, and enterprise cloud adoption.

- **Built the APAC SRE practice into a firm-wide reference model** by establishing operational governance, engineering standards and reliability practices adopted across global teams
- **Solved a large-scale operational support bottleneck** by delivering an AI-powered self-service knowledge platform, reducing manual support effort by 50% and improving engineering productivity by 35%
- **Enabled migration and operational readiness for 1,000+ production applications on AWS** by providing technical leadership, guidance, and hands-on troubleshooting support to application teams across the firm, materially accelerating the cloud adoption programme.

Senior Associate — Application Security Engineering

Jan 2016 – Oct 2019

JPMorgan Chase & Co., Singapore

Progressed through two levels in three years while contributing to the firm's enterprise engineering transformation initiatives that enabled integrated CI/CD at scale.

- **Enabled the firm's CI/CD modernisation strategy** by re-architecting the legacy application security scanning platform from batch-based processing into a real-time, event-driven model, reducing scan execution times from 8+ hours to under 15 minutes, supporting 2,000+ daily scans across 5,000+ applications.
- **Selected for Expert Engineer Programme (2019)** - the firm's flagship technical leadership cohort comprising 100 distinguished technologists globally.

PRIOR EXPERIENCE (2005 – 2015)

UOB, Singapore

Senior Software Engineer · 2015

Led implementation of enterprise banking platforms and core system integrations.

National Health Group, Singapore

Senior Software Engineer · 2014

Led healthcare data platform and clinical workflow engineering initiatives.

Wells Fargo India Solutions, India

Senior Technical Lead · 2011 – 2014

Led design and delivery of SOA-based enterprise lending platforms and modernisation initiatives across distributed stakeholder groups.

Infosys Technologies, India

Technical Lead · 2005 – 2011

Delivered enterprise technology solutions for telecom, retail and financial services clients while leading technical teams and cross-functional delivery initiatives

EDUCATION & CREDENTIALS

Master of Technology — Information Technology

2002 – 2004

Jawaharlal Nehru Technological University, India

Bachelor of Technology — Computer Sciences

1997 – 2001

Nagarjuna University, India

Certifications:

- Microsoft Certified: Azure Administrator Associate
- AWS Certified Solutions Architect – Associate
- Certified Kubernetes Application Developer
- Hashi Corp Certified: Terraform Associate
- Generative AI Advanced Professional – NUS School of Computing
